### Trizol Silicone Spray Lubricant Stops Squeaks, Reduces Friction

Trizol Silicone Spray Lubricant has been the effective choice for external lubrication for decades. Used by major industrial, commercial, military and municipalities, Trizol Silicone contains appreciably more silicone than other brands, and dries quickly.

This non-flammable lubricant provides non-greasy lubrication and anti-stick properties by leaving a

clear, clean lubricating film where applied. It is safe for almost any surface. It stops squeaks, repels water, reduces friction, stops sticking and keeps rubber soft and flexible.

For more information,  
contact Castoleum Corporation,  
Box 41, Yonkers, NY 10710-0041.
